FLEXLINX - VOXINTERNET

Along with your FLEXLinX services, NuVox offers your business VoxInternet, a comprehensive set of Internet and web features at no additional charge. VoxInternet keeps your business online and on the cutting-edge of today's fast-paced global economy.

Features of VoxInternet

- ▶ **High-Speed Internet.** Your dedicated connectivity is delivered via a T1 facility directly into your business' network, allowing you to choose the appropriate bandwidth for your business. Your bandwidth will travel our state-of-the-art network—a network dedicated exclusively to business Internet access customers.
- ▶ **Web Hosting and DNS.** Web Hosting provides a “parking space” for your business' website. Your website will reside on NuVox secure servers that we maintain and monitor 24x7. You receive 80M of web hosting space and domain name registration with your FLEXLinX service.
- ▶ **Email with SpamLess.** Customers receive 20 email boxes with 20M of storage space each. Our spam-filtering service will help you weed-out junk mail and advertisements from your inbox. NuVox also includes anti-virus scanning within SpamLess, which helps prevent infected emails and attachments from entering inboxes undetected. Plus, NuVox updates its anti-virus software real-time, ensuring that customers always receive maximum virus protection.

Advantages of VoxInternet

- ▶ **VoxInternet is Secure.** Because the NuVox network is private, public Internet traffic does not interfere with the security of your business communications.
- ▶ **VoxInternet is Comprehensive.** From high-speed Internet to web hosting and email with anti-virus protection, NuVox offers you all the tools you need to do business online.
