VoxIP: WEB PORTAL

The NuVox VoxIP Web Portal adds valuable extras to your VoxIP service – and the web portal is absolutely free!

Features of the Web Portal:

- ▶ **Click to Call.** Simply click who you want to call and pick up your phone without having to physically dial the number.
- ▶ **Find Me, Follow Me.** On the go? This feature allows you to personalize phone options to forward incoming calls to up to three different phone numbers, in the order you specify. If you do not answer the call, it rings back and voicemail picks up. If you choose to consecutively ring different numbers in order, you can specify the approximate number of rings for each phone number before the next number on the list is dialed.
- ▶ **Forward All Calls.** Similar to the Find Me, Follow Me feature, this treatment will forward all of your calls to another number. With this option activated, you will be able to specify the number of rings a call will receive before it is returned to voicemail.
- ▶ **Do Not Disturb.** Can't talk right now? Silence your incoming calls by forwarding all calls directly to voicemail.

Each of these features is fast, simple, and can all be easily activated using the VoxIP Web Portal – available anywhere you have Internet access.

To learn more about how the VoxIP Web Portal can work for your business, contact your NuVox Representative.

Because Business is on the Line.
